SUMMARY

Experienced in building responsive UIs using **React, NEXT.js, TypeScript, ShadCN UI**, and **Tailwind CSS**. Proficient in **MERN and NEXT** stacks, with expertise in **PostgreSQL, Docker**.

PROJECTS

Anime Haven(React)

- Developed a React-based anime browsing platform with dynamic content and smooth transitions.
- Styled the application using CSS to create a visually appealing and user-friendly interface.
- Integrated features for recommending simulcasts and information on licensed streaming platforms.
- Created a resource hub for new anime fans, offering access to free streaming sites, subscription platforms, and Telegram channels.[Visit](#)

AstraDynamic(NEXT.js)

- Developed AstraUI, a toolkit for creating responsive frontends using Next.js, ShadCN UI, and Framer Motion.[Visit](#)
- Built a modern component library with customizable elements, enhancing user engagement.
- Integrated fluid animations and responsive design, ensuring smooth performance across all devices and browsers.
- Enhanced dev experience with full TypeScript support and optimized components for performance.

Dashboard(NEXT.js,ShadCN)

- Developed a modern dashboard application using Next.js, TypeScript, and ShadCN UI for responsive design and seamless navigation.
- Implemented data visualization components, including BarChart and SalesCard, to enhance user interaction and insights.
- Integrated TanStack Table and Recharts library for dynamic data tables and charts, enhancing data presentation and analysis.[Visit](#)

SKILLS & EDUCATION

React, Next.js, TypeScript, Tailwind, Node.js, Express, ShadCN UI, Aceternity UI, MongoDB, PostgreSQL, Docker.

EIB, Bengaluru -RGIPT
