EDUCATION

B.Tech in Computer Science and Engineering , EIB RGIPT	Expected May 2025
Class XII , Holy Mission School	88.8%
Class X , BRDAV Public School	95.8%

WORK EXPERIENCE

Software Developer Intern Sambin Technologies	Dec 2024 - Jan 2025 <i>Intern</i>
- Automated Customer Service and Support via Chatbots, Configured and customized pre-trained conversational model using existing datasets and customer FAQs. Integrated the chatbot into web and mobile interfaces. - Enhanced Reporting and Business Intelligence using LLMs to convert data insights into human-readable reports via natural language generation and integrated data visualization libraries (e.g., Matplotlib)	
Conversational AI Engineer Intern Hostel Hill	Feb 2025 - Present <i>Intern</i>
AI-Powered Chatbot for Instant Customer Support and Query Resolution using LLMs for natural language understanding and personalized responses. Provided multilingual support through machine translation.	

PERSONAL PROJECTS

RepoMaster  	Dec 2024 - Jan 2025
- Developed automatic documentation generator (using TS, React, Python, Gemini API), reducing manual documentation time by 80% and automate the creation of essential project documentation and containerization. - Engineered to analyze GitHub repositories and generate README, Dockerfile, and Docker Compose files.	
PDFSage 	Sep 2024
- Built Python Streamlit application enabling natural language queries on PDFs and TXTs. - Leveraged Google Generative AI for vector embeddings with 90% accuracy in response generation. - Implemented FAISS for efficient similarity search, reducing query response time by 75% .	
Market Research AI  	Jan 2025 - Feb 2025
- Developed AI-driven market research tool using multi-agent system, automating 95% of research process. - Integrated Gemini and Exa APIs to analyze 1000+ data points for comprehensive GenAI, LLM focused research on Companies, and Final proposal generation summarizing research, use cases, and resources.	
DocVision  	Mar 2025
- Built Python-Streamlit web application leveraging Mistral OCR API with 95% text extraction accuracy. - Implemented support for both URL inputs and local file uploads ,multiple download ,Export format options.	

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C, Go lang

Technologies/Frameworks: Node.js, React, Next.js, Express, Flask, FastAPI, GraphQL, PostgreSQL ,MongoDB, Tailwind CSS, LangChain, OpenCV, TensorFlow, Numpy, Pandas,Data Analytics,RAG, PyPDF2, Matplotlib

Developer Tools: VS Code, Cursor, GitHub, Linux, Terminal, Postman, OpenAI API, Mistral API, Gemini API, Prisma ORM, Docker, Git, GCP, AWS, Firebase, Google Sheets , Microsoft Excel
