EDUCATION

B.Tech in Computer Science and Engineering, EIB RGIPT Expected May 2025
Class XII, Holy Mission School 88.8%

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C, Go lang

Technologies/Frameworks: Node.js, React, Next.js, Express, Flask, FastAPI, GraphQL, PostgreSQL, MongoDB, Tailwind CSS, LangChain, OpenCV, TensorFlow, Numpy, Pandas, RAG, PyPDF2, Matplotlib

Developer Tools: VS Code, Cursor, GitHub, Linux, Terminal, Postman, OpenAI API, Mistral API, Gemini API, Prisma ORM, Docker, Git, GCP, AWS, Firebase

WORK EXPERIENCE

Full Stack Developer Dec 2024 - Jan 2025
Sambin Technologies Intern

- Automated Customer Service and Support via Chatbots, Configured and customized pre-trained conversational model using existing datasets and customer FAQs. Integrated the chatbot into web and mobile interfaces.
- Enhanced Reporting and Business Intelligence using LLMs to convert data insights into human-readable reports via natural language generation and integrated data visualization libraries (e.g., Matplotlib)

PERSONAL PROJECTS

RailReserve Pro  Nov 2023 - Dec 2023

- Engineered scalable train reservation API using Express.js, Prisma ORM and PostgreSQL handling 10K+ concurrent requests. Implemented JWT-based authentication with 90% security compliance and Bcrypt hashing.
- Created atomic transaction handling for booking management, ensuring 100% data integrity with ACID

RepoMaster   Dec 2024 - Jan 2025

- Developed automatic documentation generator using Python and Gemini API, reducing manual documentation time by 80% and automate the creation of essential project documentation and containerization configurations.
- Engineered to analyze GitHub repositories and generate README, Dockerfile, and Docker Compose files.

PDFSage  Sep 2024

- Built Python Streamlit application enabling natural language queries on PDFs and TXTs.
- Leveraged Google Generative AI for vector embeddings with 90% accuracy in response generation.
- Implemented FAISS for efficient similarity search, reducing query response time by 75% .

Collaborative Event Management API  April 2025

- Built a FastAPI backend with secure JWT authentication, role-based access control and rate limiting; implemented full CRUD for events with conflict detection, recurring/batch creation and soft-delete via SQLAlchemy and Alembic .
- Developed an event versioning system featuring automatic snapshots, diff comparisons, changelog retrieval and rollback capabilities using a custom EventVersion model. Containerized the application with Docker Compose.

POSITIONS OF RESPONSIBILITY

Training and Placement Coordinator EIB RGIPT, Bengaluru
