EDUCATION

B.Tech in Computer Science and Engineering , EIB RGIPT	Expected May 2025
Class XII , Holy Mission School	88.8%
Class X , BRDAV Public School	95.8%

WORK EXPERIENCE

Full Stack Developer Sambin Technologies	Nov 2024 - Jan 2025 <i>Intern</i>
- Automated Customer Service and Support via Chatbots, Configured and customized pre-trained conversational model using existing datasets and customer FAQs. Integrated the chatbot into web and mobile interfaces. - Enhanced Reporting and Business Intelligence using LLMs to convert data insights into human-readable reports via natural language generation and integrated data visualization libraries (e.g., Matplotlib)	

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C, Go lang

Technologies/Frameworks: Node.js, React, Next.js, Express, Flask, FastAPI, GraphQL, PostgreSQL, MongoDB, Tailwind CSS, LangChain, OpenCV, TensorFlow, Numpy, Pandas, RAG, PyPDF2, Matplotlib

Developer Tools: VS Code, Cursor, GitHub, Linux, Terminal, Postman, OpenAI API, Mistral API, Gemini API, Prisma ORM, Docker, Git, GCP, AWS, Firebase

PERSONAL PROJECTS

RepoMaster  	Dec 2024 - Jan 2025
- Developed automatic documentation generator using Python and Gemini API, reducing manual documentation time by 80% and automate the creation of essential project documentation and containerization configurations. - Engineered to analyze GitHub repositories and generate README, Dockerfile, and Docker Compose files.	
Market Research AI  	Jan 2025 - Feb 2025
- Developed AI-driven market research tool using multi-agent system, automating 95% of research process. - Integrated Gemini and Exa APIs to analyze 1000+ data points for comprehensive GenAI, LLM focused research on Companies, and Final proposal generation summarizing research, use cases, and resources.	
Collaborative Event Management API 	April 2025
- Built a FastAPI backend with secure JWT authentication, role-based access control and rate limiting; implemented full CRUD for events with conflict detection, recurring/batch creation and soft-delete via SQLAlchemy and Alembic. - Developed an event versioning system featuring automatic snapshots, diff comparisons, changelog retrieval and rollback capabilities using a custom EventVersion model. Containerized the application with Docker Compose.	
RailReserve Pro 	Nov 2023 - Dec 2023
- Engineered scalable train reservation API using Express.js, Prisma ORM and PostgreSQL handling 10K+ concurrent requests. Implemented JWT-based authentication with 90% security compliance and Bcrypt hashing. - Created atomic transaction handling for booking management, ensuring 100% data integrity with ACID
