

ISHAN KUMAR

+91 6203063894 ◇ Bengaluru, India

bhardwajishansingh@gmail.com ◇ github.com/Allmight-456 ◇ <https://ishankumar.live>

SUMMARY

Experienced in building responsive UIs using React, NEXT.js, TypeScript ,Express,RESTful APIs.Proficient in MERN and Python with expertise in Go,Python,PostgreSQL, Docker,Git ,Mongo.

EDUCATION

Class X, BRDAV Public School	95.8
Class XII, Holy Mission School	88.8
B.Tech in Computer Science, EIB RGIPT	Expected 2025

SKILLS

Frontend Frameworks	React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS
Backend ,DB Skills	Node.js, Express, Next.js ,GO lang, Python,MongoDB, Postgres
DevOps	Docker, Kubernetes, Linux, Git

EXPERIENCE

Web Developer Intern	Dec 2023 - Jan 2024
CodSoft	Online

- Developed full-stack web applications during a 4-week internship at CodSoft, gaining hands-on experience in backend development, system programming, and frontend optimization
- Applied API development, database management, and authentication protocols, utilizing Docker, Git, Vercel, and Firebase for debugging, deployment, and cloud technologies.

Web Devloper	Sep 2024 - Oct 2024
Freelance	Online

- Developed a modern dashboard application using Next.js, TypeScript, and ShadCN UI, integrating responsive navigation and dynamic data visualization.
- Implemented interactive data tables with TanStack Table and charts using Recharts, enhancing user experience with tooltips and custom UI components.

PROJECTS

SecureBook An Express-based Contact Application, Developed a RESTful API using Express.js and MongoDB for managing a contact database, incorporating user authentication with JWT and secure password hashing using bcrypt. ([GitHub](#))

Anime Haven Developed "Anime Haven," a React-based web application for browsing anime content, featuring a user-friendly interface styled with CSS and dynamic elements. The project aims to guide new anime fans by providing information on licensed streaming services, subscription platforms, and community resources.([GitHub](#)) ([Demo](#))

DockerSmith Developed a Python-based Dockerfile generator using Langchain, Gemini API, and Render for database persistence, which creates Dockerfiles for GitHub repositories from repo links. The project features a simple React frontend for user interaction and future plans include '.dockerignore' file suggestions.([GitHub](#))

CERTIFICATIONS

- MERN stack ,DevOPS , NEXT.js , Docker (100xDevs)
- PostgreSQL (Simplilearn)
