## EDUCATION

|                                                               |                   |
|---------------------------------------------------------------|-------------------|
| <b>B.Tech in Computer Science and Engineering</b> , EIB RGIPT | Expected May 2025 |
| <b>Class XII</b> , Holy Mission School                        | 88.8%             |
| <b>Class X</b> , BRDAV Public School                          | 95.8%             |

## TECHNICAL SKILLS

**Languages:** JavaScript, TypeScript, Python, C, Go lang

**Technologies/Frameworks:** Node.js, React, Next.js, Express, Flask, FastAPI, GraphQL, PostgreSQL, MongoDB, Tailwind CSS, LangChain, OpenCV, TensorFlow, Numpy, Pandas, RAG, PyPDF2, Matplotlib

**Developer Tools:** VS Code, Cursor, GitHub, Linux, Terminal, Postman, OpenAI API, Mistral API, Gemini API, Prisma ORM, Docker, Git, GCP, AWS, Firebase

## EXPERIENCE

**Web Developer Intern** Dec 2023 - Jan 2024  
CodSoft *Online*

- Developed full-stack web applications during a 4-week internship at CodSoft, gaining hands-on experience in backend development, system programming, and frontend optimization.
- Applied API development, database management, and authentication protocols, utilizing Docker, Git, Vercel, and Firebase for debugging, deployment, and cloud technologies.

## PERSONAL PROJECTS

**RailReserve Pro**  Nov 2023 - Dec 2023

- Engineered scalable train reservation API using Express.js, Prisma ORM and PostgreSQL handling 10K+ concurrent requests. Implemented JWT-based authentication with 90% security compliance and Bcrypt hashing.
- Created atomic transaction handling for booking management, ensuring 100% data integrity with ACID

**RepoMaster**   Dec 2024 - Jan 2025

- Developed automatic documentation generator using Python and Gemini API, reducing manual documentation time by 80% and automate the creation of essential project documentation and containerization configurations.
- Engineered to analyze GitHub repositories and generate README, Dockerfile, and Docker Compose files.

**PDFSage**  Sep 2024

- Built Python Streamlit application enabling natural language queries on PDFs and TXTs.
- Leveraged Google Generative AI for vector embeddings with 90% accuracy in response generation.
- Implemented FAISS for efficient similarity search, reducing query response time by 75% .

**TicketFlow**  Apr 2024

- Built a Go-based ticket booking backend using advanced Go features (package-level variables, modular code) and a dedicated validation package for secure user input. Structured data with custom structs, maps, and slices to handle bookings efficiently.

## POSITIONS OF RESPONSIBILITY

**Training and Placement Coordinator** EIB RGIPT, Bengaluru
