EDUCATION

B.Tech in Computer Science and Engineering, EIB RGIPT	Expected May 2025
Class XII , Holy Mission School	88.8%
Class X , BRDAV Public School	95.8%

WORK EXPERIENCE

Software Developer Intern Rayvector Technologies	May 2025 - Current <i>Intern</i>
- Developed Test automation for enterprise file management system, covering configuration validation, storage, file lifecycle management, and end-to-end integration scenarios for PB-scale archival operations. - Developed and trained a custom 4-class RT detection model for industrial vision, debugging critical framework CUDA errors & tuning data pipeline configurations to achieve 74% AR.	
Software Developer Intern Sambin Technologies	Nov 2024 - Jan 2025 <i>Intern</i>
- Automated Customer Service and Support via Chatbots, Configured and customized pre-trained conversational model using existing datasets and customer FAQs. Integrated the chatbot into web and mobile interfaces. - Enhanced Reporting and Business Intelligence using LLMs to convert data insights into human-readable reports via natural language generation and integrated data visualization libraries (e.g., Matplotlib, Seaborn)	

PERSONAL PROJECTS

RailReserve Pro 	Nov 2023 - Dec 2023
- Engineered scalable train reservation API using Express.js, Prisma ORM and PostgreSQL handling 10K+ concurrent requests. Implemented JWT-based authentication with 90% security compliance and Bcrypt hashing. - Created atomic transaction handling for booking management, ensuring 100% data integrity with ACID	
RepoMaster  	Dec 2024 - Jan 2025
- Developed automatic documentation generator (using TS, React, Python, Gemini API), reducing manual documentation time by 80% and automate the creation of essential project documentation and containerization. - Engineered to analyze GitHub repositories and generate README, Dockerfile, and Docker Compose files.	
Collaborative Event Management API 	April 2025
- Built a Python FastAPI backend with secure JWT authentication, role-based access control and rate limiting; implemented full CRUD for events with conflict detection, recurring/batch creation and soft-delete via SQLAlchemy and Alembic . - Developed an event versioning system featuring automatic snapshots, diff comparisons, changelog retrieval and rollback capabilities using a custom EventVersion model. Containerized the application with Docker Compose.	

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C, Go lang

Technologies/Frameworks: Node.js, React, Next.js, Express, Flask, FastAPI, GraphQL, PostgreSQL ,MongoDB, Tailwind CSS, LangChain, OpenCV, TensorFlow, Numpy, Pandas, RAG, PyPDF2, Matplotlib

Developer Tools: VS Code, Cursor, GitHub, Linux, Terminal, Postman, OpenAI API, Mistral API, Gemini API, Prisma ORM, Docker, Git, GCP, AWS, Firebase
